

Ontolica Search for MOSS 2007

What is Ontolica Search for MOSS 2007?

Ontolica Search gives you consistent search across MOSS 2007 and WSS 3.0 sites.

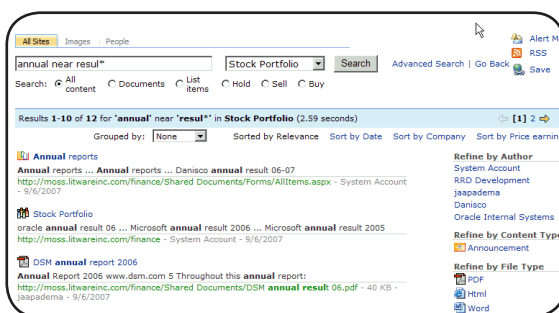

It improves the users' search experience, leading them to the information they are looking for, by improving all basic search features in MOSS 2007.

Ontolica Search provides you with a perfect overview of your metadata, and allows you to configure the search interface, enabling end-users to categorize and adapt search to individual needs.

By adding Ontolica Search, IT-professionals are saved months of reprogramming MOSS 2007 to the specific needs of organizations using SharePoint.

Ontolica Search is extremely flexible and customizable, and has an abundance of clever and indispensable features.

Why use Ontolica Search for MOSS 2007?

Screenshot of Wildcard Search in Ontolica Search for MOSS 2007.

Because you want to get the full return on your SharePoint investment!

Ontolica Search gives you access to MOSS 2007 Web Parts and the tools to use the information. Using these tools will help you make the most of the people in and around your organization – employees and customers alike.

Ontolica has a wide range of features – some simple and some highly sophisticated, which will enhance the output of your websites dramatically.

We offer two versions of Ontolica Search:

- Ontolica Wildcard - A FREE download of Wildcard Search.
- Ontolica Search - The full package which includes all of the features, as well as Support and Upgrade.

Features:

- Wildcard Search (*)
- Metadata Search
- Image Search
- Folder Search
- Federated Search
- Advanced People Search
- Search across WSS and MOSS
- ...and much, much more!
